

CMS

Optimize your operations with a modern maintenance management platform that automatically builds Accreditation Compliance reporting from your daily activities.

## The Best Tools to Run Safe and Efficient Hospitals

**Access your cloud-based CMMS anywhere, anytime** to lower your IT requirements and overhead costs.

**Designed for the end user**, you can feel confident you're investing in a CMMS your team will love.

**Intuitive single-screen views** empower your users to conveniently view work order history, upcoming PMs, labor charges and material charges without clicking through multiple screens.

**Truly mobile CMMS apps** allow your team to go paperless and work anywhere with the CMS Request app.

**Customize dashboards and views** based on each user's role to streamline data entry and accuracy.

## Supporting over 400 million ft<sup>2</sup> of facility space each year

**Quality Support.** FSI offers the leading healthcare CMMS with continuous development and 24/7 support.

**Speed.** Easily add and edit records anywhere, on any device. If you're migrating from your previous CMMS, we'll get you up and running within weeks with on-site data collection, rapid implementation, and onboarding support.

**Flexibility.** Customize your CMMS to fit the way you work and feel confident you're investing in a solution your team will love.

**ROI.** Use your data to drive a 400% return on your investment.

## Easily Tailor System Access

- Cloud-based CMMS available on any operating system including your iOS, Android, and Windows platforms.
- Work online or offline without losing data.
- Separate your information access between service departments and segments.
- Use CMS and CMS Tech to quickly scan, find and perform work orders on laptops and handheld devices.

## Improve Data Reliability

- Standardize data entry and records with categories across Manufacturers, Models, Assets, Work Order fields, and more for scalable reporting.
- Identify fields that are "Required" and "Visible" for work orders and asset records.
- Search across asset and work order User-Defined Fields to view comprehensive histories.

## Scalable Reporting

- Automate or customize reporting with 300 templates via email to promote compliance, productivity, and management of your facility space.

## Prevent Unplanned Downtime

- Maintain an accurate parts inventory and forecast needed materials for upcoming maintenance with a comprehensive materials database.
